Bevel Siding – Pattern Catalog

Typically used for siding on houses, garages or other buildings; the Shiplap style is popular because of the ease of installation and the professional look of the finished job. Pick from our library of existing patterns, bring in a sample for us to match, or dream up your own custom look. We stock the hardware, stain, paper for the wall and everything else you'll need. Select from a wide range of wood species and grades to get just the look you'll be satisfied with.

Bevel Siding – Patterns

<u>Pattern Number</u>	<u>Coverage Factor</u>	<u>J&W has knives</u>	<u>Pattern</u>
-----------------------	------------------------	---------------------------	----------------

DEFINITIONS AND DISCLAIMERS

Actual thickness and width of final product may vary from the measurements listed in this catalog. Attributes that contribute variable sized measurements include the lumber species, whether the starting material is made out of rough, or surfaced, green, or dry among other variables.

Coverage Factor: Multiply the “coverage factor” by the number of square feet you need to cover in order to estimate how many Lineal Feet of this board you need, add three to five percent for downfall. Quantities may also vary based on how material is installed including gapping etc.

[The coverage factor itself is calculated by dividing 12 by the coverage area of the board. For example the coverage factor of a board that has 5 ½” coverage is 2.18 (12/5.50)].

NOTE REGARDING BEVEL SIDING COVERAGE: Coverage factor in this catalogue for bevel siding is calculated assuming 1” overlap for Plain Bevel and is calculated assuming ½” overlap for Rabbeted Bevel. Actual material requirements will vary based on your actual overlap.

J&W Has Knives,  = J&W’s mill has knives on hand for these patterns for **softwood** material. No additional knife making fee should be needed (subject to confirmation).

J&W Has Knives,  + = J&W’s mill has carbide knives on hand for these patterns that can be used on **softwood, hardwood, and Extira** material. No additional knife making fee should be needed (subject to confirmation).

 = Information complements California Redwood Association

WRCLA = Information complements Western Red Cedar Lumber Association

EE = Eased edge.

S1S = Surfaced one side, meaning the visible side will have a smooth surfaced texture.

S2S = Surfaced two sides, two sides will have a smooth surfaced texture.

<u>Pattern Number</u>	<u>Coverage Factor</u>	<u>J&W has knives</u>	<u>Pattern</u>
-----------------------	------------------------	---------------------------	----------------

PLAIN BEVEL NAILING METHOD
Horizontal Siding
(Side view)

Face nail with one nail only per bearing. Drive nail so shank clears the top of the preceding undercourse.

BEWARE OF DRIVING NAIL HOME WITH TOO HEAVY A FINAL BLOW. WOOD MAY SPLIT OR CUP DUE TO NON-SUPPORT IN CAVITY.

RABBETED BEVEL* NAILING METHOD
Horizontal Siding
(Side view)

Face nail with one nail only per bearing. Drive nail about one inch above lower edge of course.

*NOTE: Allow 1/8" expansion gap at rabbet for CKD Rabbeted Bevel patterns. With air-seasoned Rabbeted Bevel patterns, butt the edges snugly together.
