

## Shiplap Siding – Pattern Catalog

Typically used for siding on houses, garages or other buildings; the Shiplap style is popular because of the ease of installation and the professional look of the finished job. Pick from our library of existing patterns, bring in a sample for us to match, or dream up your own custom look. We stock the hardware, stain, paper for the wall and everything else you'll need. Select from a wide range of wood species and grades to get just the look you'll be satisfied with.

## Shiplap Patterns

<u>Pattern Number</u>	<u>Coverage Factor</u>	<u>J&amp;W has knives</u>	<u>Pattern</u>
-----------------------	------------------------	---------------------------	----------------

### DEFINITIONS AND DISCLAIMERS

Actual thickness and width of final product may vary from the measurements listed in this catalog. Attributes that contribute variable sized measurements include the lumber species, whether the starting material is made out of rough, or surfaced, green, or dry among other variables.

**Coverage Factor:** Multiply the “coverage factor” by the number of square feet you need to cover in order to estimate how many Lineal Feet of this board you need, add three to five percent for downfall. Quantities may also vary based on how material is installed including gapping etc.

[The coverage factor itself is calculated by dividing 12 by the coverage area of the board. For example the coverage factor of a board that has 5 ½” coverage is 2.18 (12/5.50)].

**J&W Has Knives,**  = J&W’s mill has knives on hand for these patterns for **softwood** material. No additional knife making fee should be needed (subject to confirmation).

**J&W Has Knives,**  + = J&W’s mill has carbide knives on hand for these patterns that can be used on **softwood, hardwood, and Extira** material. No additional knife making fee should be needed (subject to confirmation).

 = Information complements California Redwood Association

**WRCLA** = Information complements Western Red Cedar Lumber Association

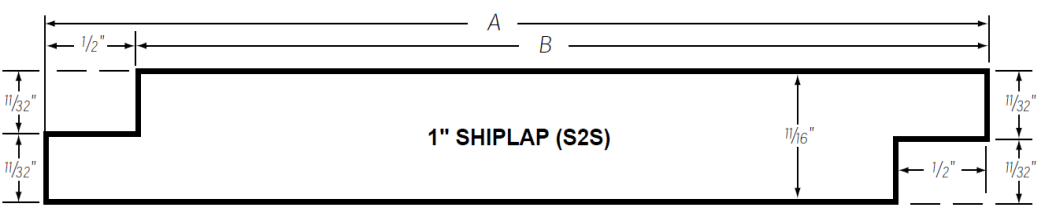

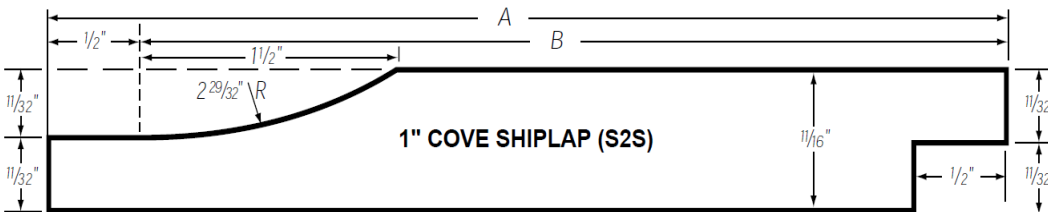

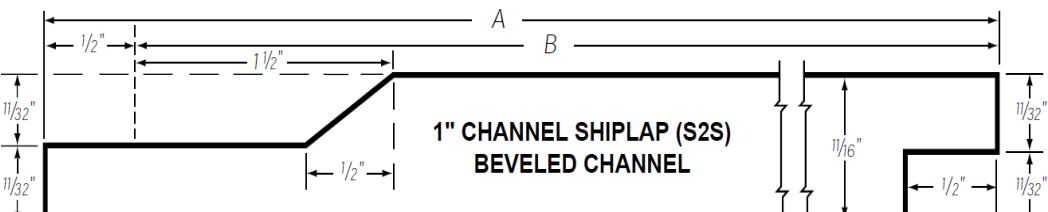

**EE** = Eased edge.

**S1S** = Surfaced one side, meaning the visible side will have a smooth surfaced texture.

**S2S** = Surfaced two sides, two sides will have a smooth surfaced texture.

### V SHIPLAP NAILING METHOD

Horizontal or Vertical Siding  
(Side view)

For 6-inch V Shiplap patterns, use one nail per bearing with the nailing point one inch from the overlapping edge. For patterns wider than six inches, face nail with two siding nails per bearing. Position nails one quarter the width of the material in from each edge.

### CHANNEL SHIPLAP\*

#### NAILING METHOD

Vertical Siding  
(Overhead view)

Use one nail an inch from the lap for 6-inch Channel Shiplap. Face nail with two nails per bearing for 8-inch and wider patterns. Space nails 1-1/2 inches from edge of overlap and two inches from edge of underlap for 8-inch boards. Nail wider patterns proportionately.

\*NOTE: Allow 1/8" expansion gap at the edges of courses for CKD Channel Shiplap patterns. With air-seasoned Channel Shiplap patterns, butt the edges snugly together.
