

Raising a stronger roof for less

RAISE YOUR EXPECTATIONS

Saving money doesn't require compromising quality. Doing your research and finding a better way is part of 'The Code' we live by and MAXITILE roofing is the result of following this ideal. That's why we build it stronger, lighter and easier to install.

NEW & IMPROVED!

SHAKELITE | SLATELITE Roof Panels

Our SHAKELITE and SLATELITE Panels are 4-foot long staggered or straight roofing panels used to minimize labor and time on a project without losing the natural look of cedar or the realistic feel of slate.

- Developed with **Advanced Technology**
- **Built durable** to resist any weather condition or climate
- Backed by a **50-year limited warranty**
- Preferred by professionals due to its **money-saving advantages**

SHAKELITE

Better than wood, SHAKELITE Panels offer the warm feel of wood shingles without the short-term life and extended risks of real cedar.

STRAIGHT EDGE

STAGGERED EDGE

SLATELITE

Ideal for European architecture, our SLATELITE Panels give the appearance of the finest grained, foliated rock possible but without the high cost of traditional slate.

TECHNICAL SPECIFICATIONS

Installed Weight: Approximately 4.7 lbs./sq. ft.
Dimensions: Field Panel - 16" x 48" panel
 Hip & Ridge - 6" x 18"

Building it right – like in the good old days.

We're raising a stronger roof for less!

MAXITILE® roofing continues to raise the roof with its use of state-of-the-art technology and undeniable performance. Backed by an industry-leading 50-year limited warranty, we promise to manufacture a superior roofing product that has been built for long-lasting durability.

MAXITILE roofing products will help you save money on materials and labor. After you realize just how much money can be saved on a job with MAXITILE, you may never look at other "more labor-intensive" roofing products again.

- Save money with quick installation
- Lightweight and durable
- Realistic, natural textures
- Environmentally responsible
- Installed direct to deck

Let our large panel size provide fast and simple installation, more endurance and the realistic feel of wood or fine-grained slate. Choose the texture and leave behind the frustration of complex construction and expensive materials.

P10: The Lightweight Roofing Alternative

Whether it's Clay, Terracotta Red, Flashed Clay or Flashed Red, our MAXILITE P10™ tile has the long-lasting durability and proven performance that you need.

Why is MAXILITE P10 so in demand?

Because MAXILITE P10 is a classic Spanish profile in a four-corrugation roofing tile that puts the proof of savings in every panel. It adds rich, traditional Spanish tile attractiveness to every roof without the added cost of surplus labor due to its easy-installation.

At an installed weight of only 3.7 pounds per square foot, it is one of the lightest cementitious roofing products available in the market. It requires no structural bracing when re-roofing wood shake or asphalt shingle roofs.

TECHNICAL SPECIFICATIONS

Installed Weight: Approximately 3.7 lbs. / sq. ft.
Coverage: 24 panels per square (100 sq. ft.)
Dimensions: Field Tile: 36.7" wide by 24" long
