

LIFESTYLE  
READY TO  
INSTALL

OUTDECO® is the original innovator of Australian hardwood modular outdoor screens. The Gardenscreen™ range represents cost-effective, versatile and ready-to-install decorative screens to enhance any backyard or landscape project big or small. OUTDECO's unique size, format and production system has been specifically engineered and tested to suit harsh outdoor conditions.

# THE RANGE

**The choice maybe functional or purely personal and stylistic**

All Panels 5/16" thk, approximately 10lbs

## 60% PRIVACY

These light, open designs are designed less for privacy, more for partial visual partitioning and to create playful effects of light and shadow within an outdoor/indoor space.

## 80% PRIVACY

With a moderate to high level of privacy, these designs offer the most versatile and desired balance of privacy and 'openness' for many applications. The 80% privacy ratio is directly relevant to many building and boundary applications that require specific compliance. See "Screening Compliance" below.

There is a broad range of distinct visual styles for your specific project. In the universal backyard scenario of dealing with an ugly paling fence or utility, these designs can both cover the existing fence as a new facade and extend-up beyond the existing height so that the fence and neighbors are out of your sight, and the entire extent of space is utilized.

## 90%+ PRIVACY

This range is specifically designed for a privacy level that compares to traditional decking timber slat screens or louvered features. The slots are of minimal width, so that at an indirect angle you can not see through, and at a direct angle you can only see tiny slithers of light through the panel. Private entrances, high privacy fences, yard fences are great applications. The fact that these minimal design are almost solid panels, also makes them great for cladding and boxing features. For example cladding planter boxes or retaining walls, bench-seats storage boxes for pool equipment and utilities etc.

### POOL FENCES

In specific scenarios these high privacy designs have narrow slot details, and may also constitute part of a compliant non-climbable barrier structure or pool fence. See specific details on individual designs and consult relevant authorities or building professional.

### WHY DIFFERENT PRIVACY LEVELS?

The 3 different privacy levels offer engineered levels of screening for personal preference or for privacy (blocking-out the neighbors). The modular nature of the product makes it versatile to a plethora of practical applications and effects, and this variation of privacy level broadens the scope further.

### SCREENING COMPLIANCE

The levels also offer a clear designation for compliance to specific building codes and local planning regulations.

These regulations can be complex and may vary slightly from region to region, so we advise you do your homework with your building professional or through the local authority.

**USA INSTOCK ITEMS & SPECIAL ORDERS**

DESIGNS MARKED WITH USA FLAG ARE AVAILABLE NOW. SPECIAL ORDERS: Panels shown without USA flag can be special ordered with an approximate lead time of 8-10 weeks.

# THE BACKYARD IN EVOLUTION

The American backyard is a treasured part of our culture and lifestyle. Cook-outs, pool parties and backyard football are all fond childhood memories, but whilst the dream lives on, our aspirations and needs have changed dramatically.

We have less time, less space, higher lifestyle aspirations and we are unwillingly being drawn closer and closer to our neighbors. Our outdoor space is an extension of our living space, to a point where the 2 blend into one big lifestyle space. Extending and beautifying the paling fence or blocking out the neighbors is a universal problem to solve.

# SUSTAINABLE AUSTRALIAN HARDWOOD

Sustainable Timber

100% Australian Made

## The Soft Warm Organic Feel of Timber

Pictured here is the distinct and beautiful texture of OUTDECO® Decoshield™ Natural Finish. This rich fibrous texture and dark tannin color is the look that OUTDECO® pioneered and is sought for. Without the hard sharp edges and 'hot-plate' heat of steel in the sun, timber offers the look and feel of a sought, warm, organic compliment to living foliage in the landscape, not to mention it is carbon negative as opposed to carbon positive metal options. The core substrate is created from sustainable timber by-product that is only certified new-growth source and, is otherwise waste. Hardwood fibre makes up 97 per cent of the substrate, and amazingly there are no nasty synthetic additives like other composite boards. The hardwood substrate has been proven in building application for decades and OUTDECO's designers, product engineers and industrial chemists, have developed the product over many years.

## 10 Year Material Warranty

10 YEAR WARRANTY against material rot, bloat or delamination under normal outdoor 'run-off' conditions. Screens mounted in vertical plain, not submerged/ constant contact with water, soil or chemicals. Installations are the responsibility of the installer. Directions must be followed, see online for more details.

## PROTECTED BY DECOSHIELD™

Unique to OUTDECO® this finish comes as factory standard, so each panel is ready-to-install in this finish, and can be enjoyed with little to no maintenance. The Decoshield™ system is designed to moderate the weathering process, so that you can enjoy its rustic weathering (preferred by most users), or it is primed to coat in a color (exterior water-base paint of your choice) or top-coated with a decking stain or seal product to keep or bring back the rich dark oiled look. This Penetrating Protective Stain System, is a low VOC, multi-process system which provides even coloring and can not be replicated with common timber decking products applied to generic cut-sheet board.

## NATURAL WEATHERING COMPARISON

### COLD & HOT CLIMATES

#### DECOSHIELD™ NATURAL FINISH

Shown here after 5-years in an outdoor installation, the Decoshield™ Natural Finish (OUTDECO factory standard) has dulled and softened to a rustic look which is desired by many users.

#### GENERIC HARDWOOD BOARD

In comparison this is an identical test panel in same installation as above, cut from generic Hardwood Board and coated with generic decking coating. Note; dramatic and uneven discoloring, uneven absorption of coating and blemish spots.

#### DECOSHIELD™ NATURAL (WITH REJUVENATING TOP COAT)

For alternative look, see this installation of Decoshield™ Natural Finish (factory standard), coated with rejuvenating top-coat, to bring back rich dark sealed look.

Termite Resistant

Mahjong™ is one of our 60% privacy/blockout range. It's simple rectangular geometry creates a visual language can be drawn to oriental, art deco or 60s geometry. It's more open and lighter than the 80 or 90%+ designs, so is very effective as partial partitioning within a space, or as a dramatic effect on a wall or fence.

Decoshield™ NATURAL FINISH  
shown here with DIY coating  
Exterior White Acrylic

Leafstream™ is a 60% Privacy/ Blockout Design. Its flowing organic form is reminiscent of flowing water, leaves or indigenous textures like string fish nets. It creates beautiful shadow effects in natural light and is a perfect compliment to a garden. Compared to our other patterns its very light and open, and is brilliant for ambient visual effects as a suggestive divider, some wall art or vertical interest or even as an internal feature.

BUNGALOW™

AVAILABLE NOW

Bungalow™ is a popular choice in our 80% privacy/ blockout range. It's lineal but organic language has a very strong tie to the natural landscape and can compliment, yet soften vertical structure within a landscape. At 80% privacy/ blockout it is perfect for boundary screening on a fence or wall, great for walling features and many other applications.

Note: This pattern repeats  
over 2 panels. Flip 180°

OSAKA™ is from our original 80% privacy/ blockout range. It's traditional geometry has a Japanese influence (without being obviously 'oriental' in theme). It is also reminiscent of 60s geometric styling which is very current. At 80% privacy/ blockout it is perfect for boundary screening on a fence or wall, great for walling features and many other applications.

WOOLOOMAI™ has a loose wavy nature that dances across the surface, evocative of the ocean, an iconic beach theme, river rapids or (in portrait orientation), foliage. Its 80% privacy/ blockout makes it suitable and compliant for most common “boundary fence” scenarios, at height barriers and a plethora of other applications.

This pattern is available in Decoshield™ NATURAL & BLACK

MARAKESH™ is a popular classic. Its geometry is influenced by Moroccan patterns, but its simple organic treatment is reminiscent of interwoven branches and marries with mid-20th century architectural screening which continues to resurge in contemporary design. Its 80% privacy/ blockout makes it suitable for the common "boundary fence" scenario and a plethora of other applications.

OUT  
DECO

This is a brilliant example of an indoor/outdoor feature. This old warehouse space with a full wall of natural light and vintage industrial detailing, but was quite cold, grungy and soul-less. The screen feature wall created needed life and 'pop' with random panels painted in bright colors, and clusters of vertical garden panels. See Coating details to see how this color effect was achieved.

NEST™ is a part of our 80% privacy/ blockout range and is the opposed of geometric. Inspired by the tangled mass of bird's nest, tangled undergrowth or tribal rattan weaving the pattern is a simple organic textural backdrop to blend into your outdoor space. It also lends itself to an oriental theme.

At 80% privacy/ blockout it is perfect for boundary screening on a fence or wall, great for walling feature and many other applications.

# HERRINGBONE™

## 80% PRIVACY

**MODULAR CLADDING**  
PATTERN REPEATS FOR INFINITE  
SIZE OF INSTALLATION

HERRINGBONE™ is our unique play on an artisan and architectural pattern that is both contemporary and ancient at the same time. It is reminiscent floor tile of ancient architecture from Europe, to Middle-East and Asia, but also seen in uber-chic fashion textiles of mid-century and now in the edgiest contemporary interiors. The geometry is super simple, but with a little twist to create a zig-zaggy play that will breakup large imposing rectangular surfaces, and offer a complimentary effect to foliage. The pattern has been refined to a 80% privacy level, so that it is compliant for many privacy and boundary applications, and is has a mid-range visual impact for artistic effects.

# GONDWANA™

THIS DESIGN  
AVAILABLE ON  
SPECIAL ORDER:  
Approximate lead time  
8-10 weeks

**90%+ PRIVACY**

Panels 5/16" thk,  
approximately 10lbs

Handy  
Sturdy  
Modules

**MODULAR CLADDING**  
PATTERN REPEATS FOR INFINITE  
SIZE OF INSTALLATION

GONDWANA™ was inspired by the treasure of Australian old-growth rainforests, in which many of the species and visual detailing has endured since the prehistoric supercontinent of Gondwana . The thin lines are designed to offer 90%+ privacy for a screening on-par with traditional timber slats, and create an overall architectural language of vertical repetitive rhythm, but the fluid organic lines trickle and meander down the surface to create a subtle softening, yet distinct architectural backdrop to your garden or outdoor lifestyle space. The almost 100% coverage makes it perfect for unique walling-cladding features or as a free-standing fence, partition. The lines are indicative of a cascading waterfall, the layering bark of a giant old-growth tree trunk, or even the minute patterning of vibrant green undergrowth foliage.

DECO

STAR ANAIS™ has a simple but striking geometry is reminiscent of Japanese or Moroccan motifs, but simplified to 60s style modernism. At 90%+ privacy/ blockout it creates a unique new alternative to high privacy screening like timber slats, but with a whole new visual language.

**Gardenscreen™** Modular Decorative Screen Panels

# ORCHARD™

## 90%+ PRIVACY

Panels 5/16" thk, approximately 10lbs

THIS DESIGN AVAILABLE ON SPECIAL ORDER: Approximate lead time 8-10 weeks

48"x24"

Handy Sturdy Modules

**MODULAR CLADDING**  
PATTERN REPEATS FOR INFINITE SIZE OF INSTALLATION

ORCHARD™ has a lineal language and foliage based details, which make it a simple organic style, that is soft and complimentary to many architectural styles and a perfect backdrop to garden foliage. The privacy or blockout is almost total, making it a perfect solution for high privacy or cladding type applications like cladding planters, bench/ storage boxes, retainers etc.

## ENDLESS OPTIONS

The Gardenscreen range is specifically designed for easy installation, and in the majority of projects the modular panels are installed as is. However the timber substrate is easy to cut to specific sizes or coat for alternative options. Most of the patterns have a directional characteristic, but can be installed in any orientation to create unique effects.
