CEDAR SHINGLES SIMPLIFIED

An
American
O R I G I N A L

A NATURAL CHOICE FOR

Beauty

The genuine, natural color and grain of Western Red Cedar transform a residence into a work of art. Cedar shingles lend dimensionality to a home's design. Give each angle drama. And create an expression of unmatched quality and timeless appeal.

Cedar not only outlasts trends in style: it outlasts other building materials. The wood is renowned for its inherent resistance to the effects of rain, sun, pests and time. Its cellular structure makes an excellent insulator, and allows for natural resistance to weather conditions ranging from severe summer heat to brutal winter storms.

A NATURAL MONESYSAVER

Shakertown's 8-foot panels install up to 10 times faster than individual shingles. And it's faster and far safer than cement, plastic, vinyl and other imitations.

With our exclusive self-aligning edges, one worker can line up and secure panels with a hammer or nailing gun.

You won't come to the end of your patience when you come to the end of the building. Because our flush corners match panels exactly and are a breeze to install.

Not only that, Shakertown panels are sized to match stud spacing so you don't lose a thing to trim. You pay for coverage instead of board feet, which saves you up to 30% on overlap waste. And the clean, finished line of a pre-inspected panel means the end of soiled, split or knotty shingles to hand-sort and toss out.

For 50 years now,
ShakerTown has been
beautifying and protecting
homes across North America. That's a claim few other siding
materials can make. With a track record that spans half a century,
our history speaks for itself. Nothing else compares to the rich appearance
and outstanding performance of our cedar shingle panels.

A TRUE
Original

SHAKERTOWN *Craftsman* SHINGLE PANEL®

Tapered panel
has a traditional
3/8" butt

The Shakertown Craftsman Shingle Panel is the builder's choice as the best cedar shingle panel in the industry. Manufactured using only the finest Western Red Cedar vertical grain heartwood, the panels are easy to install and will project a lasting beauty on any home as the primary siding or as an architectural detail.

Craftsman Shingle Panels feature a full plywood back, thick 3/8" butt, overlocking end-joints and can be installed by one person, up to 10 times faster than individual shingles. And this 1-course panel reduces waste by 75% over 3-course panels.

A scribed nailing line makes for easy nail location and the nails are then concealed by the next course of panels. Available in standard exposure sizes of 7" and 4-1/2", a 14" exposure is available as a face-nailed panel. Panels are easily pre-finished for more time savings.

YOUR CRAFTSMAN PANEL

EXPOSURES

MATCHING CORNERS

Mitered Shakertown corners add a quality finishing touch with less labor required.

SPACING OPTIONS

Contemporary style
Set tight and touching to add a smooth, uniform finish to modern designs.

Keyway style
Vertical spacing between shingles lends visual interest and traditional appeal.

BUTT OPTIONS

Even butt
Creates a consistent, symmetrical line in keeping with both traditional and contemporary styles.

Staggered butt
Adds character and dimensionality to a home's finished appearance.

PRE-FINISHED PANELS

Pre-Finished Shakertown shingle panels save time, both during installation and for ongoing maintenance.

Develop AN ACCENT

Round Fancy Cuts Panel

Set your imagination loose with Fancy Cuts. Let your ideas take shape for the perfect accent to a bay window, front entry or gable end. Different shapes can be combined for endless possibilities, giving you the chance to develop your own signature look.

Each Fancy Cuts shingle is 100% clear, 100% edge grain Western Red Cedar. Natural variations in color and grain give each shingle its own unique look. All Fancy Cuts are precision cut and sanded. Buy individual Fancy Cuts shingles to mix-and-match patterns or create an original design.

*Fancy
Cuts*

Fancy Cuts are packaged 96 pieces to the carton. One carton covers 25 sq. ft. when shingles are installed at the 7-1/2" exposure recommended for exteriors. For interior accents, a carton of Fancy Cuts covers 33 sq. ft. when applied with a 10" exposure. Eight patterns are also available on a custom order basis in convenient 8-foot panels with 5" exposure. It's never been easier or more convenient to have the hand-crafted appearance of Fancy Cuts.

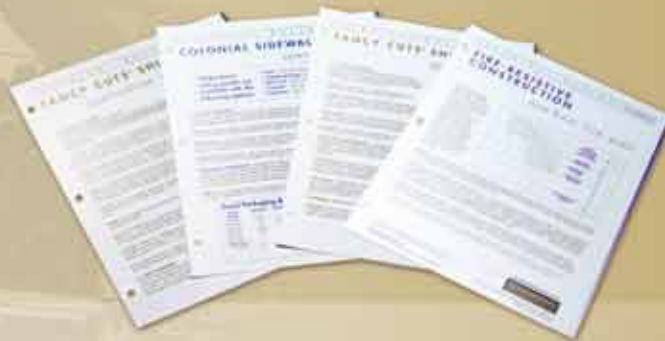

Why Side WITH US?

1. Over 50 years of experience manufacturing cedar shingle panels.
2. High quality curb appeal, unmatched by imitators.
3. Self-aligning feature allows fast and easy application.
4. 8-foot lengths cut installation time over lap siding and individual shingles.
5. Made with 100% clear vertical grain heartwood cedar for quality appearance and durability.
6. Fire retardant and preservative treatments available.
7. Applies to curved walls with up to 5-foot radius.
8. Dozens of experts nationwide, ready to help you.
9. Shakertown Colonial panels available in 1-course, 2-course and 3-course configurations.

THE RIGHT ANSWERS, RIGHT NOW.

To fully meet high quality panel standards, Shakertown conducts a rigid in-plant quality control program. These quality control standards are systematically monitored by Timber Products Inspection, an independent inspection and testing agency. Independent testing laboratories have performed the following tests on Shakertown siding panels:

Racking Strength #171-081
Impact Load Horizontal ASTM E72-77
Surface Burning ASTM E-84
Concentrated Load and Pull Tab Test W 73-387
Transverse Load Test ASTM E72-80

Shakertown siding meets the requirements of all major building codes, including: ICC (ER-1962); ICBO (ER-1962); BOCA (Report no. 88-14); SBCCI (Report No. 9410); CMHC (Report No. 7172); HUD (Materials Release 978a).
