

# MIRATEC VS. THE COMPETITION.

## No Other Trim Performs Like MiraTEC.

- >> Resists moisture, rot and termites.
- >> Reversible with a clear, cedar wood grain texture on one side and a smooth surface on the other.
- >> Handles like wood; easy to machine, cut and nail.
- >> Won't check, split or crack.
- >> TEC™ patented process makes MiraTEC a solid board that has uniform properties throughout.
- >> Building code compliant (ESR-3043).
- >> Primed with an ultra-low VOC primer containing a mildewcide.
- >> Available in 5/8", 3/4" (4/4) and 1" (5/4) thicknesses, 16' lengths and widths from 2" MiraTEC batten to 16".

IN HEAD-TO-HEAD COMPETITION,  
IT'S NO CONTEST.

### PULVERIZES

#### HARDBOARD/FIBER AND OSB

MiraTEC is 9x more durable based on test data.\*

### CRUSHES

#### FIBER CEMENT

MiraTEC is more durable and resists moisture better, at a better value.\*

## MIRATEC®

Treated Exterior Composite TRIM

**BORN TO BE BADDEST.**

### HAMMERS

#### PVC

MiraTEC is kind to the environment, and looks great no matter what color it is painted, at half the price.

### SLAMS

#### PRIMED WOOD

MiraTEC outlasts and outperforms wood, with a 50-year warranty to prove it.

# HERE'S THE PROOF.

## MIRATEC VS. FIBER CEMENT

- >> Fiber cement is less resistant to moisture, and independent, third party tests say so.
- >> Fiber cement is available in shorter lengths, can be brittle and typical warranty terms are 15 years.

## MIRATEC VS. HARDBOARD

- >> MiraTEC performs up to 9 times better in Weatherability Testing, which evaluates a product's ability to withstand exposure to the elements over time.
- >> Hardboard is a laminated product.

## MIRATEC VS. OSB

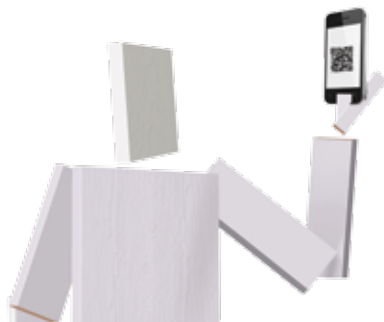

- >> MiraTEC performs close to 4 times better in Weatherability Testing.
- >> OSB is not reversible.

## MIRATEC VS. PVC

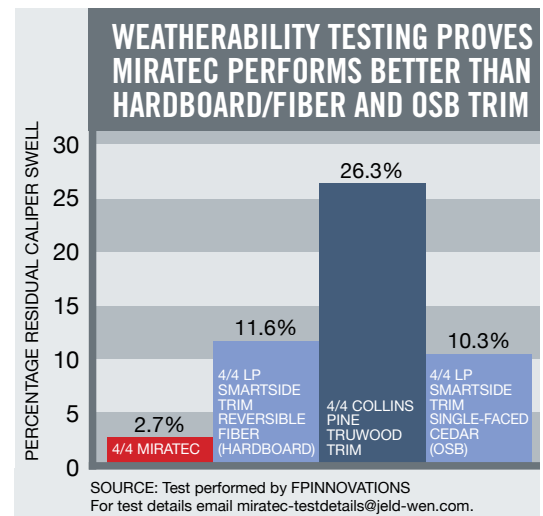

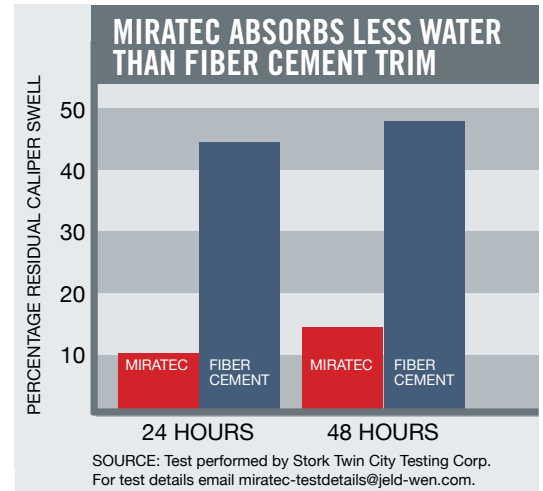

- >> MiraTEC is not prone to thermal expansion. PVC may change size in response to UV exposure and temperature change

## MIRATEC VS. PRIMED WOOD

- >> MiraTEC doesn't require significant maintenance and replacement, because it resists moisture, rot and termites. Primed wood may be treated, but many do not offer rot and termite protection.
