*The "Demolizer" reciprocal saw blades are designed for very rough service use. Superior cutting performances are achieved through technological advances using our patented "Two by Two" tooth design. They are manufactured with 0.063" (1.6mm) bi-metal steel so each blade absorbs the abuse that comes with rough service use. As a result, our "Demolizer" blades guarantee you'll get up to 30% faster cutting speeds and almost double the blade life over our regular high speed bi-metal blades.
